## Structural Engineer

Spaxel owns, operates, and develops real estate projects leveraging technology & innovative operating models to create distinctive residences.

We are a young and lean team. In Prishtine we employ a centralized back-office handling tenant support, marketing, leasing, procurement, accounting, IT, interior design, and architecture.

Our Prishtina talent has years of experience in residential and commercial real estate development and operations. Extended time-zone working hours allow us to effectively respond to issues around the clock. Our young and energetic team manages our properties, people, tenants, and vendors digitally and our deployed technology allows us to run operations smoothly.

We are seeking an experienced Structural Engineer to join our team. The ideal candidate will be responsible for designing and analyzing structural components and systems for various construction projects. The successful candidate will have a strong understanding of structural engineering principles and experience working with various materials such as steel, concrete, and wood.

### Responsibilities:

- Design and analyze structures and structural components for a variety of construction projects, including residential, commercial, and industrial buildings.
- Prepare detailed drawings and specifications for construction projects.
- Collaborate with architects, contractors, and other professionals to ensure that projects meet design specifications and project deadlines.
- Perform structural analysis and calculations to ensure that designs meet safety and building code requirements.
- Provide technical support to construction crews and project managers.

### Requirements:

- Bachelor's degree in civil or Structural Engineering.
- 5+ years of experience in structural engineering, with a focus on design and analysis.
- Strong understanding of structural engineering principles and design codes.
- Experience working with various materials, including steel, and light steel.
- Proficiency in engineering software and analysis tools, such as AutoCAD, Robot structural analysis, and Revit.
- Excellent analytical and problem-solving skills.
- Strong communication and collaboration skills.

---

If you have a passion for designing safe, innovative, and functional structures, we encourage you to apply for this exciting opportunity.
